

Gentlemen,

I am opposed to IBOC digital radio as it is not consumer friendly in that it is not compatible with current receivers and consumers would have to purchase all new equipment. The IBOC system is not backwards compatible with current systems. The NRSC and NAB have stated that IBOC on AM will only be usable during the daytime. It is unacceptable if the system is not usable 24 hours. I would prefer us to use the Eureka 147 system that all the nations in the rest of the world is using either in the 220 mHz band or the L-Band currently in use by the military.

Thank you,
John Olson
